DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-11 and 33, 35-38 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,095,915 Engelson.

Engelson discloses the same invention being a medical device comprising an elongated wire core member 38 having a distal end having a tapered and constant radius portions [3:60-4:2], a polymer jacket (44) free of a coil having a textured surface comprising a helical groove having an inner diameter smaller than the diameter of the jacket and spaced 3 cm from the distal tip [1:67-2:2] and a coating disposed over the polymer jacket [3:60-4:2].

In regards to claims 3, 8, and 34 the examiner is interpreting the grooves of Engelson to have an inner edge that is rounded because the cross-section is cylindrical. If the inner edge was not rounded the cross-section would be a square.

Response to Arguments

Applicant's arguments filed 7/31/08 have been fully considered but they are not persuasive. The applicant argues that rove of Engelson does not have a rounded edge. However the shape of an edge depends on your orientation when looking at it. For example figure 6 of Engelson shows the grooves edges square, but when looking along the central axis it is clear that this grove wraps around the device to follow the cylindrical shape of the device. Therefore due to the helical nature of the channel the inner edges when looking at a longitudinal cross section would have a rounded shape.

The applicant then argues that the distal end of the groove of Engelson id not disposed proximally of the distal end of the jacket. The examiner strongly disagrees. The applicant is advised to look any of figures 2 and 4-7 of Engelson where the groove clearly ends proximal of the jackets distal end.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
